In this training...

You will recognize the level of systemic knowledge you have, expand it and through it look systemically at projects, teams, organisations and any system focusing specifically on the most important keys, which are the **Systemic Principles**.

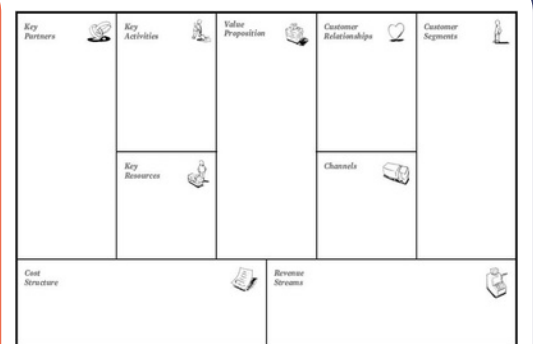

Principles that govern all systems as ordering forces in the undercurrent of any project.

Systemic Canvas: A map for navigating complexity

SYSTEMIC

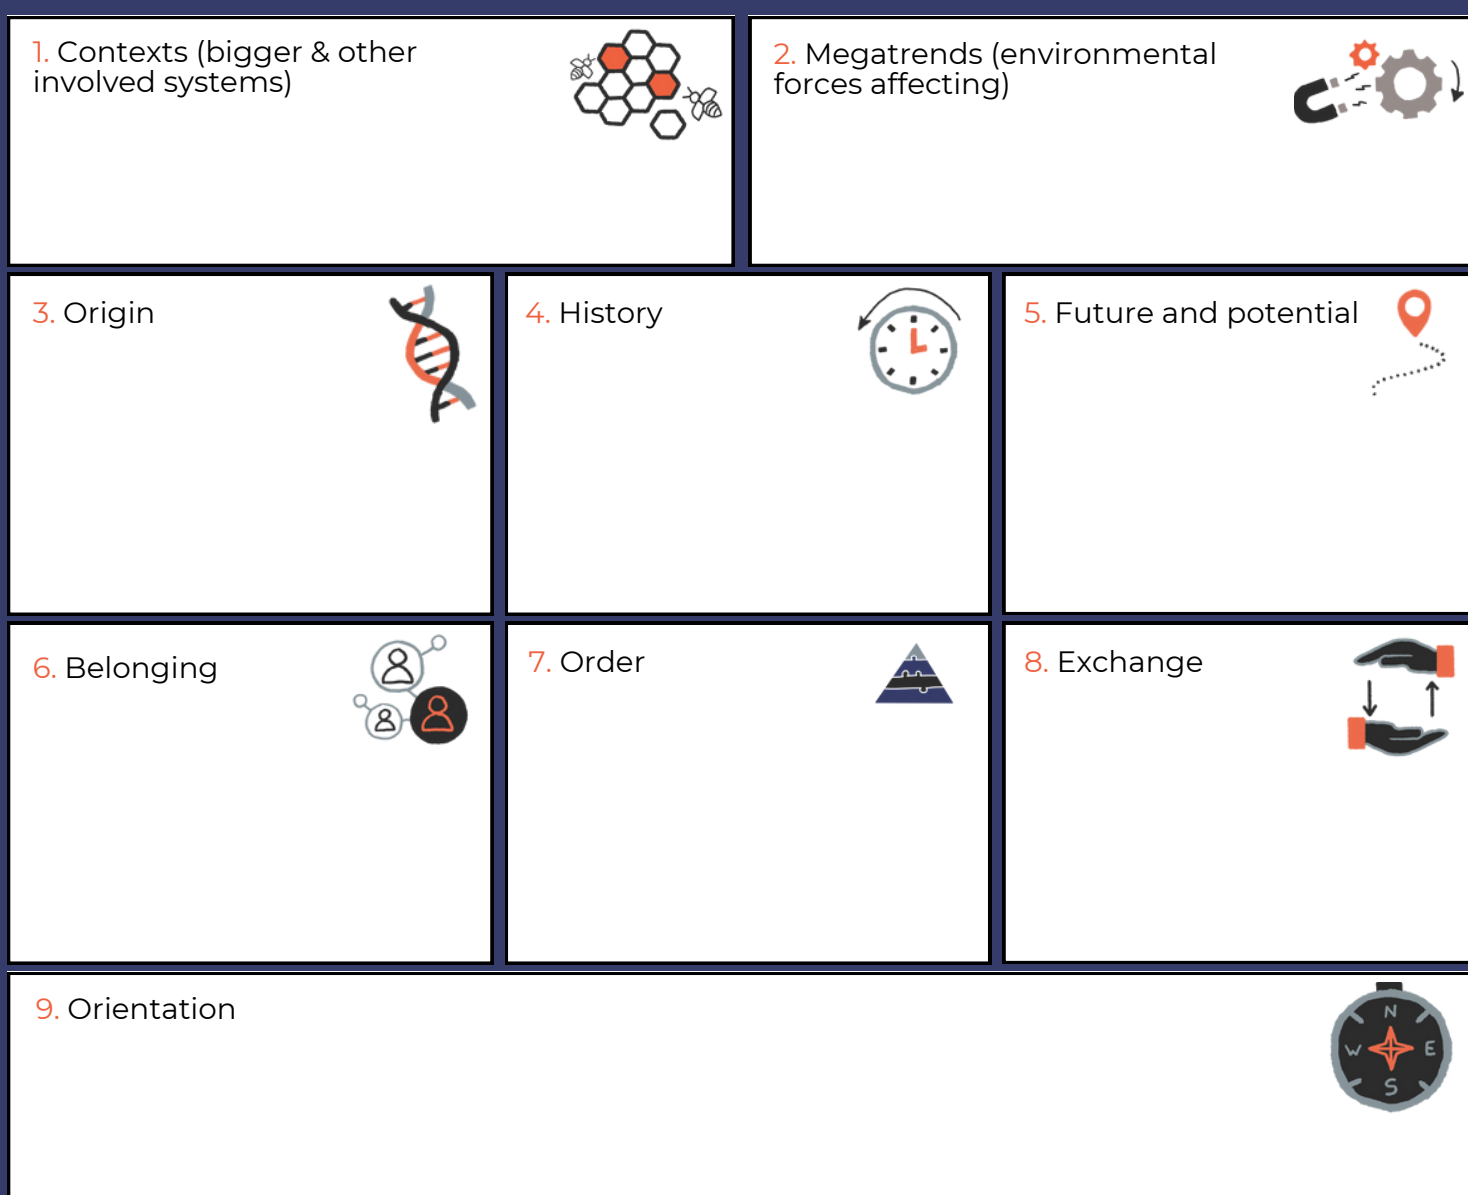

CANVAS

COMPLEXITY

This is what it looks like

Systemic Canvas

What is it and what can it do for you?

A "map" to focus and approach your project, business, team or even your organization as a system.

An agile Systemic Leadership tool to address complexity and intervene in contexts of uncertainty to generate change.

WHAT CAN IT DO?

The systemic canvas is a guide that explores concepts to bring the focus to key points below the organisational iceberg. We call these the levers.

These concepts - illustrated as blocks in the canvas - are operational levers that trigger upstream effects to the whole of the organisation.

Mapping them and bringing them to light is a powerful way for:

- Leading.
- Piloting change.
- Cultural transformation.
- Making decisions.
- Designing strategies.

Through the Systemic Canvas, we are ultimately creating more efficient and healthier organisations that can serve their clients, end users and society better.

FOR WHOM

Entrepreneur.
Manager & Team Leader.
Change Agent.
Consultant & Coach.
Working Team.

WHAT FOR?

- ✓ Understanding organizations as living systems.
- ✓ Responding intentionally, not reacting on autopilot.
- ✓ Effective Leadership.
- ✓ Leading change, making informed decisions, and designing effective strategies.
- ✓ Addressing dysfunctional issues and avoiding superficial fixes.
- ✓ Ensuring coherence and alignment for better market presence.
- ✓ Serving as a preventive guide, not just a reactive tool.
- ✓ Facilitating in-depth analysis and focused efficient conversations.
- ✓ Creating a shared vision of the project and aligning team discussions.
